

ATLANTIC MEDICAL IMAGING, LLC
POLICY STATEMENT
SUBJECT: Compensation for voluntarily giving up days off for practice needs. Policy: #7

PURPOSE:

In order to compensate radiologists who voluntarily come to work and give up a day off or vacation in order to help the practice when short, this policy will offer some benefit/compensation in recognition of such.

SCOPE:

- When a radiologist *voluntarily* relinquishes a day off or vacation day by a request of the practice, that radiologist will be entitled to have first choice of available days off before the schedule encompassing those days are published. The person handling the schedule will email them and let them know each period before the publishing of the schedule what days are available, with a 24-48 window. They may choose as many days up to the number of days they relinquish. If they do not choose any for that period, they will continue to be given that opportunity until they have used up those days.
- In addition, the days will be separated into vacation and days off, meaning, if you give up a vacation day, the day off you pick in compensation will be recorded as a vacation day, *not* a regular day off, so you do not lose a random day off.
