

OVERVIEW

THE VASCULAR INSTITUTE

The Vascular Institute is proud to be a regional leader in minimally invasive procedures to treat a variety of conditions. We are a clinically based practice offering comprehensive patient care from consultative services to complete patient management and clinical follow up.

At the Vascular Institute we offer cutting edge, minimally invasive therapies as well the most advanced diagnostic imaging such as high definition CTA imaging and carbon dioxide angiography allowing for zero nephrotoxicity in high risk patients. We strive to provide the highest level of care, and to this end we are currently actively participating in several clinical studies.

SERVICES WE OFFER

- Treatment of peripheral arterial disease. We have the latest, cutting edge technology including atherectomy, medication coated stents, and medication coated balloons. We are currently enrolling patients in a trial evaluating treatment of in-stent restenosis.
- Treatment of venous disease including varicose veins and more advanced venous disease.
- Treatment of back pain related to vertebral compression fractures.
- Treatment of pelvic pain secondary to uterine fibroids, adenomyosis, and pelvic congestion syndrome. We hope to start enrollment for a trial evaluating uterine artery embolization for adenomyosis.
- Dialysis intervention including treatment of dialysis fistulas and grafts as well as catheter placement and management.
- Vascular access including PICCs and ports.
- Paracentesis and thoracentesis.
- Imaging guided biopsy.
- Interventional Oncology - We are proud to partner with AtlantiCare to offer comprehensive interventional oncology including Y90 radioembolization, TACE, cryoablation, and microwave ablation.

MEET OUR PROVIDERS (CONTINUED ON REVERSE SIDE)

Nicholas Petruzzi MD, FSVM

Director of the Vascular Institute/ Director, Interventional Oncology

Dr. Petruzzi is a board certified Vascular and Interventional Radiologist and a Diplomate of the American Board of Radiology. He is the director of the Vascular Institute and director of Interventional Oncology Services for Atlantic Medical Imaging. He is also an attending physician at AtlantiCare Regional Medical Center. Dr. Petruzzi focuses on the treatment of peripheral vascular disease, and is experienced in performing complex peripheral interventions for occlusive arterial disease to aid with healing of chronic wounds. He has authored manuscripts and delivered lectures on today's cutting-edge techniques for treating both arterial and venous disease.

Michael J. Schmidling MD, RPVI

Section Chief Interventional Radiology, AtlantiCare Regional Medical Center

In 2007 Dr. Schmidling joined Atlantic Medical Imaging. He has continued treating venous disease and has played a critical role in developing an Interventional Oncology program here in South Jersey. Dr. Schmidling continues to perform all types of minimally invasive procedures including uterine artery embolization, angiography and angioplasty, and treatment of vertebral compression fractures with kyphoplasty. He currently serves as section chief of the Division of Interventional Radiology at AtlantiCare Regional Medical Center.

Rajesh I. Patel MD

Dr. Patel attended Hahnemann University School of Medicine in Philadelphia. He completed his diagnostic radiology residency at Harbor-UCLA Medical Center in Los Angeles. Dr. Patel completed a fellowship in Vascular and Interventional Radiology at St. Luke's Roosevelt Hospital in New York. He is a board certified diagnostic radiologist and an attending physician at AtlantiCare Regional Medical Center. His clinical interests include women's health, peripheral arterial disease and critical limb ischemia.

Christopher Kim MD

Dr. Kim attended Duke University and earned a Bachelor of Science degree in Biology. He completed medical school and his diagnostic radiology residency training at Albert Einstein Medical Center. Dr. Kim completed a fellowship in Interventional Radiology at the University of Virginia. He has special interest in aortic and peripheral arterial interventions, critical limb ischemia, and interventional oncology.

Jacinto Camarena III MD

Dr. Camarena completed his undergraduate education with honors at California State University and attended Howard University College of Medicine. He completed his residency in Diagnostic Radiology at the University of Rochester Medical Center and pursued additional fellowship training in Vascular and Interventional Radiology at the University of Miami, Jackson Memorial Hospital and Sylvester Comprehensive Cancer Center. Dr. Camarena practices a wide breadth of Interventional Radiology and has a special interest in minimally invasive cancer treatments. He strives to educate his patients and provide compassionate, patient-centered care.

Mike Watts MD, FSIR

Dr. Watts is an interventional radiologist dedicated to providing the highest level of service through clinical excellence and a commitment to patient and family centered care. He specializes in advanced peripheral arterial disease techniques, minimally invasive cancer treatments, venous disease, and management of portal hypertension. He has been invited to speak on these topics at multiple regional, national, and international conferences. Dr. Watts is committed to limb preservation, treating CLI on a full time basis using advanced and innovative techniques to bring unsurpassed quality of care to patients throughout New Jersey.

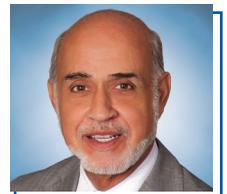

Matthew Samra DO, FACOS

Dr. Samra is a board certified Vascular and Cardiothoracic surgeon and a fellow of the American College of Osteopathic Surgeons. He attended medical school at the Kirksville College of Osteopathic Medicine and completed his general surgery residency at Wyckoff Heights Medical Center, an affiliate of Weill Cornell Medical College. Dr. Samra completed fellowships in cardiothoracic surgery and vascular surgery at the Deborah Heart and Lung Center. Always on the cutting edge of technology and treatment of vascular disorders, Dr. Samra looks forward to continuing his tradition of caring for his patients, helping them achieve good health and giving them the quality of life they deserve.

Kamal Kassis MD

Dr. Kassis joined the Vascular Institute at Atlantic Medical Imaging on July 1, 2017. He brings 36 years of experience in vascular surgery. Dr. Kassis performs all types of vascular procedures including carotid surgery, repair of abdominal aortic aneurysms, treatment of peripheral vascular disease, limb salvage procedures and wound care and has extensive experience in all types of dialysis access. Dr. Kassis is fellowship trained in vascular surgery. He is an attending physician at AtlantiCare Regional Medical Center. Dr. Kassis is ready to provide the best care for his patients.

Jamie K. Roesch MSN, RN, AGPCNP-BC Vascular Interventional Advanced Nurse Practitioner

Jamie Roesch is a Vascular Interventional Advanced Nurse Practitioner at Atlantic Medical Imaging. She first obtained her Bachelor of Nursing from Thomas Jefferson University School of Nursing in Philadelphia. She then went on to complete her Master of Science in Nursing degree with a concentration in Adult-Gerontology as a Nurse Practitioner from Stockton University. Jamie graduated with honors and is an active member of the Sigma Theta Tau International Honor Society of Nursing. In addition to evaluating patients at the time of consultation and at follow-up visits, she also performs select interventional procedures.

Matthew Soos MSN, RN, AGACNP-BC Vascular Interventional Advanced Nurse Practitioner

Matthew Soos is a Vascular Interventional Advanced Nurse Practitioner at Atlantic Medical Imaging. He first obtained his Bachelor of Science in Nursing from Ramapo College of New Jersey. He then went on to complete his Master of Science in Nursing with a concentration in Adult-Gerontology as a Nurse Practitioner at Rowan University. Matthew has participated in a nursing textbook review and enjoys research. In addition to evaluating patients at the time of consultation and at follow-up visits, he also performs select interventional procedures. Matthew has a special interest in venous disease, peripheral arterial disease, and neurosurgical pathology.

Aziza Jadallah PA-C Vascular Interventional Physician Assistant

Aziza Jadallah is a Vascular Interventional Physician Assistant at Atlantic Medical Imaging. She received her Bachelor of Science degree from the University of Vermont. She then went on to complete her Master of Medical Science in Physician Assistant Studies at Arcadia University where she graduated with distinction and was inducted into the national Pi Alpha honor society. In addition to seeing patients at the time of consultation and at follow-up visits, she also performs select interventional procedures. Aziza is interested in minimally invasive procedures and vascular disease prevention.
